

SENTINEL THREAT INTELLIGENCE REPORT

EXECUTIVE SUMMARY

This report details a coordinated phishing and ransomware campaign targeting the critical infrastructure sector. Multiple IOCs have been identified across various threat vectors.

TECHNICAL FINDINGS

Analysis of the campaign reveals a multi-stage infection chain. Initial access is gained via spear-phishing emails containing malicious PDF attachments or links to credential harvesting sites.

INDICATORS OF COMPROMISE (IOCs)

- C2 Server: 103.45.67.89
- Malicious Domain: secure-vault-verification.net
- Payload MD5: a1b2c3d4e5f6g7h8i9j0k1l2m3n4o5p6
- Drop URL: http://cdn-update-service.org/payload.exe
- Vulnerability: CVE-2023-4966 (Citrix Bleed)

RECOMMENDED ACTIONS

1. Block identified domains and IP addresses at the perimeter firewall.
2. Force password resets for users identified in access logs.
3. Apply patches for CVE-2023-4966 immediately.
